

AMRON Global Services Folder contains:

- Logo with background in coloured, white and black
- Logo without background in coloured, white and black
- Resources for designers
- Logo colour, typography and construction

The reason the logo has been packaged this way is to avoid situations where companies lose their original logo and they end up making do with one that has background and it's of low quality which is bad for the company image.

So I would love to advise that this folder be copied to the company's Drive for safekeeping and availability anywhere and anytime. If I happen to delete the folder from my Drive, the company's copy will still be intact and the company will not have a need to redesign the logo again or contact me for it since it has been kept safe.

Thank you for your patronage. We hope to serve you better next time.
